

Balanced Scorecard SOFTWARE

Build Scorecards, Track KPIs And
Manage Performance Metrics

Why Balanced Scorecard

The balanced scorecard (BSC) is a strategic performance management system that organizations use to translate strategy into operational terms. The Balanced Scorecard system connects the mission and vision with the operational elements such as objectives, KPIs, targets, and initiatives thereby providing a more 'balanced' view of your organization's performance.

Although the BSC system is widely incorporated in many organizations, the limitations to the traditional balanced scorecard solution are many and the implementation of the Balanced Scorecard successfully is still a lost-battle in many organizations.

Complete BSC solution

To provide a complete BSC solution and to overcome the shortcomings, Corporater collaborated with Dr. Kaplan and Dr. Norton, the founders of the balanced scorecard, and have built their concepts into our BSC solution.

Corporater is not limited to Kaplan and Norton's views on BSC. We have implemented additional strategy planning and execution frameworks. With Corporater, scorecards and KPIs are more than just data. They tell the complete story of your journey as you execute your strategy. Corporater provides everything you need, out of the box, including strategy maps, scorecards, strategic objectives, KPIs and strategic initiatives.
