

DATA GOVERNANCE

Governance for data governance

Corporater is used in global organisations to manage the governance of the data governance process. As a flexible governance tool, which can easily adapt to your organisational structure, Corporater can:

- Provide an over-arching 'cock pit' view of data quality for the management team, displaying emerging trends and issues management
- Deliver end-to-end management of the internal data quality management process
- Ensure that comparable data sets submitted are loaded for evaluation across multiple geographies, entities and brands
- Display the historical and current performance of data tests on specific data elements across regions, geographies, entities or countries, providing ranking capabilities for best and worst performance
- Capture data review meetings and forums including capturing, allocating, tracking and ageing of actions that are generated to resolve data performance issues
- Interface to existing data issue or incident management systems
- Wrap around other business intelligence tools to ensure alignment

What does Corporater do?

Corporater is a global software company that empowers organizations to evaluate, manage, and continually improve business performance by providing a business management platform that adapts to a client's unique business model, out of the box.
