

RegTech Docking & Integration

Bring valuable aggregated data from RegTech & Cybersecurity technologies into your management framework for a holistic regulatory monitoring, reporting, and compliance.

RegTech Docking & Integration

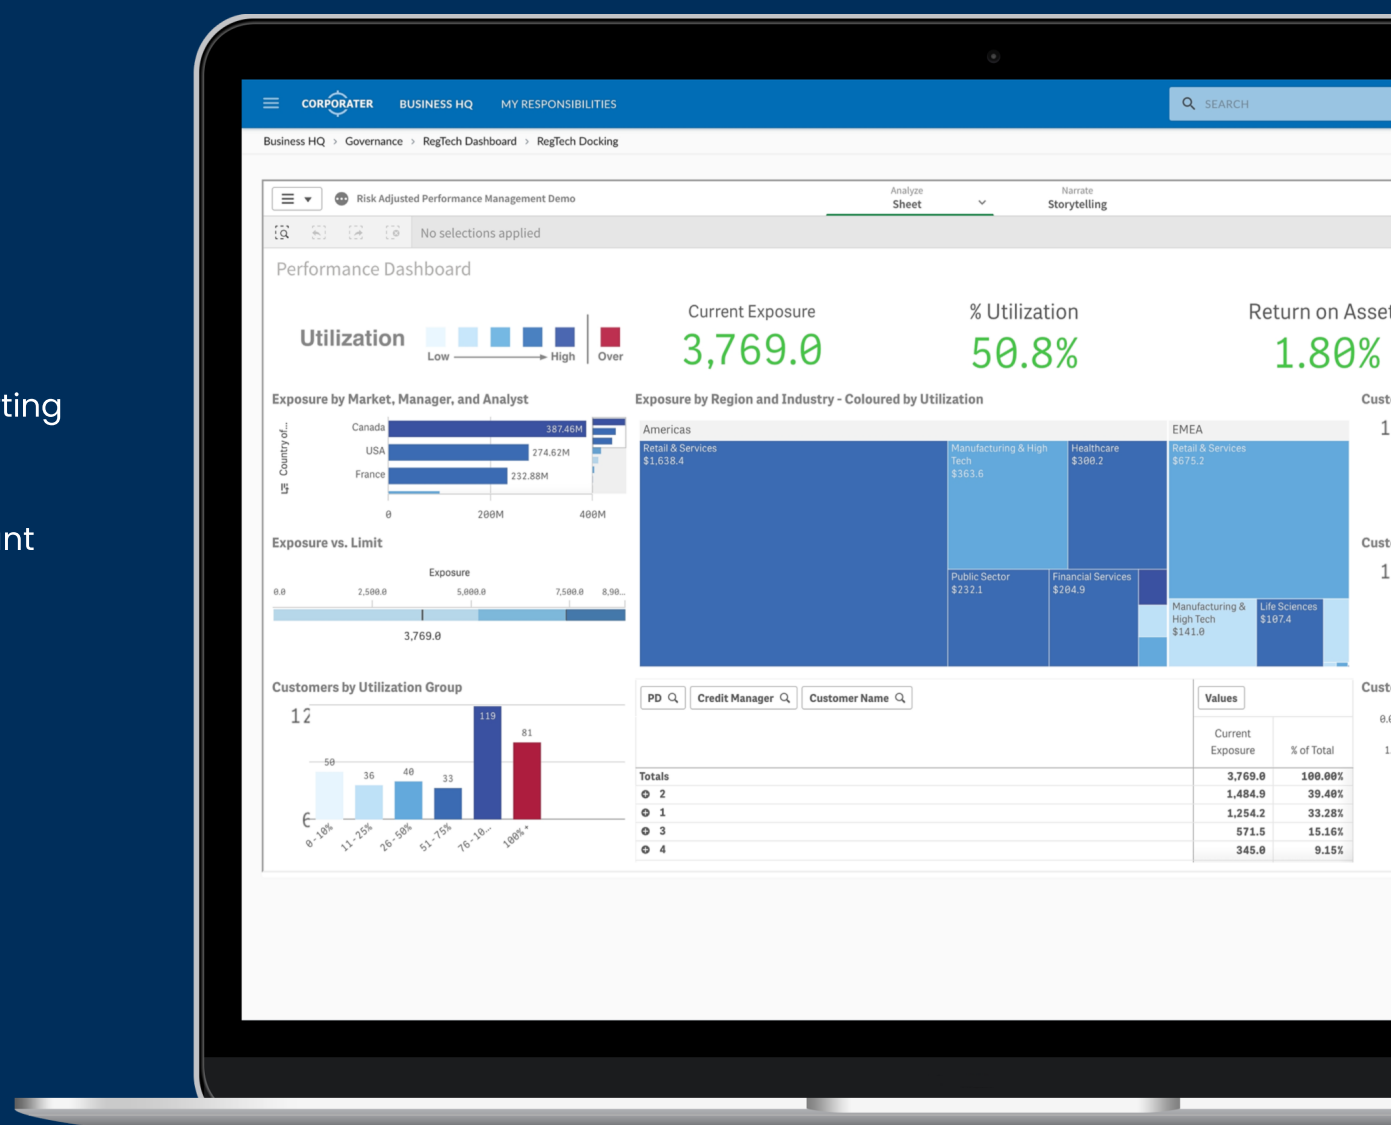

Integrate and dock data warehouses, analytics, data discovery tools, and AI-based technology needed to achieve a holistic regulatory monitoring, reporting, and compliance.

Many financial firms today use various RegTech solutions to solve compliance and regulatory issues. RegTech solutions automate costly and time-consuming tasks, however, they are often disconnected from the rest of the firms' systems, making it difficult to see the full picture.

Corporater Business Management Platform enables organizations to integrate, dock, and monitor multiple RegTech solutions into one central location for a holistic regulatory monitoring, reporting, compliance, and decision making. With Corporater, organizations can aggregate data from transactional levels, various data sources, and external systems, analyze it in business context, and feed key insights into the different layers of the organization.

Solution Highlights

- Achieve data-driven risk and compliance management
- Automate processes, workflows, and reporting
- Collect data for KRIs, KPIs or other types of metrics and bring data insights into relevant business context
- Keep up with everchanging regulations
- Discover data/information irregularities, non-conformities, and incidents
- Increase efficiency and effectiveness of business operations

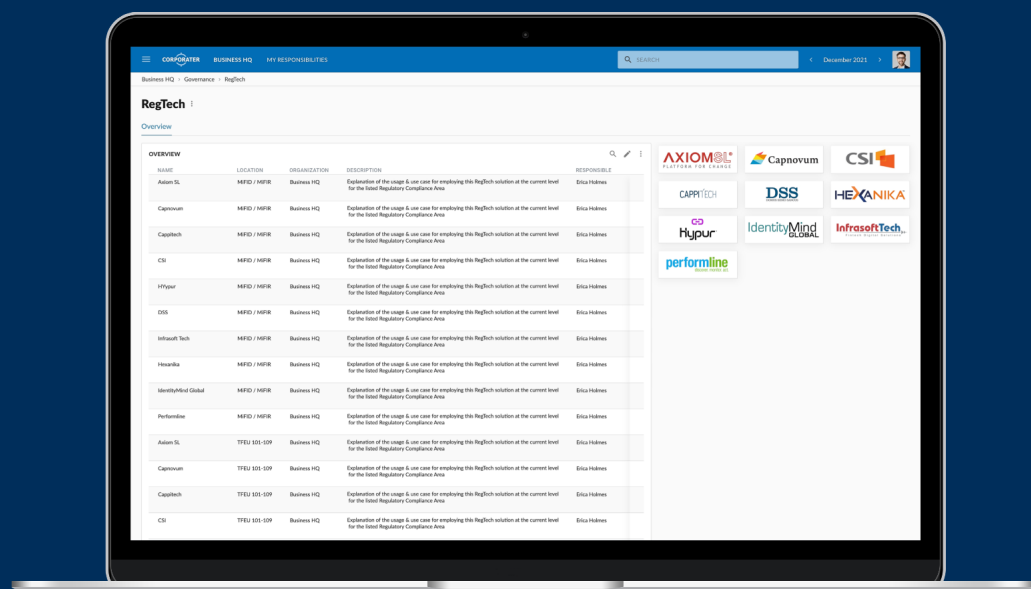

Corporater RegTech Docking & Integration software enables you to:

- Bring valuable aggregated data from RegTech & Cybersecurity technologies into your management framework for a holistic view of regulatory compliance
- Provide the board and executives with comprehensive reporting required to meet your compliance and reporting obligations

Corporater Quick Facts

- ✓ Flexible configuration
- ✓ Rapid implementation
- ✓ Industry-leading security
