CORPORATER

WHAT IS AN
ISO COMPLIANCE SOFTWARE?

An ISO compliance software helps organizations manage various ISO standards and compliance-related activities, monitor adherence to standards and procedures, and ensure continued compliance using a single tool.

Technology providers like Corporater (an authorized vendor to distribute ISO standards digitally to customers) offers pre-configured dashboards, templates, and ISO-specific checklists, making it easy for organizations to evaluate their adherence to ISO requirements, conduct audits, and become and stay ISO certified.

✓ ISO 9001
Quality management systems

Demonstrate your ability to deliver products and services that meet customer and regulatory requirements.

✓ ISO 14001
Environmental management

Proactively measure, monitor, control, and continuously improve your environmental impact.

✓ ISO 20000
IT service management

Provide your customers with the assurance that their service requirements will be fulfilled.

✓ ISO 22000
Food safety management system

Show your customers, suppliers, vendors, and partners that your organization has a proper food safety management system in place.

✓ ISO 22301
Business continuity management (BCM)

Build organizational resilience and stay prepared to respond to unexpected events and disruptions.

✓ ISO 26000
Social responsibility

Evidence your organization's commitment to operating in a socially responsible way. Foster a culture of accountability, transparency, and ethical behavior.

✓ ISO 27001
Information security management

Keep your information assets secure and protected.

✓ ISO 27005
Information security risk management

Establish and maintain a systematic approach to information security risk management and standardize the risk process across your organization.

✓ ISO 27014
Governance of information security

Achieve holistic governance and oversight of information security-related activities across your organization.

✓ ISO 31000
Risk management

Standardize your risk management, risk analysis, and risk treatment processes in accordance with ISO 31000 to achieve efficient company-wide risk governance.

✓ ISO 37001
Anti-bribery management system (ABMS)

Prevent bribery incidents, detect, and mitigate bribery risk, and combat corruption.

✓ ISO 45001
Occupational health and safety (OH&S)

Keep your workplace and employees safe, and prevent work-related accidents, injuries, and diseases.
